DETAILED ACTION

Election/Restrictions

1. Applicant is reminded that a species election remains in effect. Claims 2, 5-15, 25-54 and 56-64 remain withdrawn from consideration by the examiner as being drawn to embodiments non-elected with traverse.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1, 3, 4, 17, 18, 20-24 and 55 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 98/52907. The reference discloses biodegradable fabric compositions. The compositions may be aqueous dispersions or clear compositions (abstract). Preferred softeners are disclosed at p. 5, line 28+, and the parent fatty acids have an IV of 50-130. CHDM is a preferred co-solvent (p. 17, lines 15-16). The actives may be present in a premix at 55-85% (p. 32, lines 9+). Typical viscosities are less than 1000 cps. Premixes do not contain water until subsequently diluted. As the chemical limitations have been met, the flash point, viscosity and phase transition limitations are assumed to be met, absent evidence to the contrary. Alternatively, it would be obvious to manipulate the viscosity and flash point in the course of dilution within the disclosed ranges of water, non-aqueous solvent and principal solvent contents. Dilution in rinse water and application are the intended purposes of the compositions. Ethoxylated fatty

alcohols and amides may be added (p. 20, lines 33+). This reference differs from the claimed subject matter in that it does not disclose a composition which reads on applicant's claims with sufficient specificity to constitute anticipation.

It would have been obvious at the time the invention was made to make such a composition, because this reference teaches that all of the ingredients recited by applicants are suitable for inclusion in a surfactant composition. The person of ordinary skill in the surfactant art would expect the recited compositions to have properties similar to those compositions which are exemplified, absent a showing to the contrary.

In the case where the claimed ranges overlap or lie inside ranges disclosed by the prior art, a *prima facie* case of obviousness exists. *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976); *In re Woodruff*, 919 F.2d 1575, 16 USPQ2d 1934 (Fed Cir. 1990).

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
